

NEW PRODUCT REVEAL

Felix table/ objet d'art by Paul Wilding for Volo

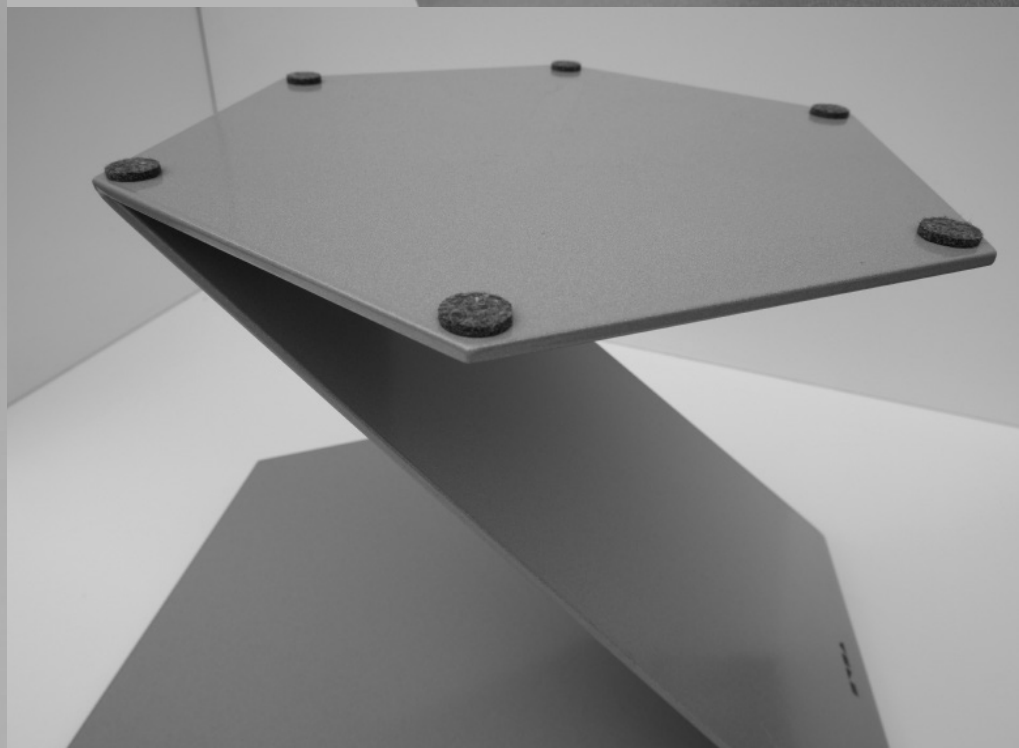

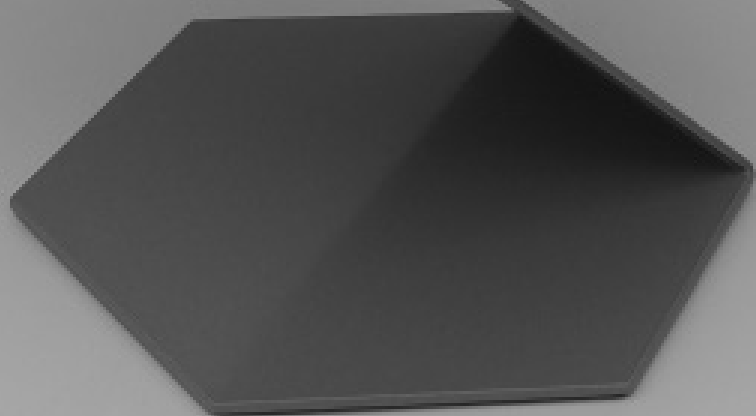

METAL
ORIGAMI

Here's a glimpse of **Felix**, the latest addition to the Volo **metal origami collection**.

Paul Wilding is unafraid of taking design risks - building a table that comes close to forsaking function in favour of form, pushing past the edges of cantilevered engineering extremes and defying the laws of gravity.

We were told that it will never work.
It has.

So, cool has become controversial - making **Felix** the ultimate in desirability and exclusivity.
